

Fragile Cargo

- Fragile cargo is highly susceptible to breakage during normal handling.
- Outer packages should be lined with cushioning material on all six sides.
- Wrap individual items separately within the package.
- Fragile items should not be in contact with each other or in contact with the outer packaging.
- Cushioning material should be sufficient to prevent movement of the contents during transport.
- Outer packages should be rigid and robust enough to resist crushing forces and fully packed to avoid inward collapse.

How to Pack and Ship Fragile Items Safely

1 Wrap the item and cushion it well.

2 Place the item in a sturdy box with cushioning material.

3 Seal the box with strong tape.

4 Label as "Fragile" for careful handling.

PACK WELL / PROTECT WHAT MATTERS
